Our Purpose

To enrich the lives of
those who **produce** and
those who **consume**,
ensuring progress for
generations to come.

Expectations for a future agriculture industry leader

Global

Integrated

**A Technology
Company**

An Innovator

A Partner

**A Global
Citizen**

**A Relationship
Business**

Corteva Agriscience Community Investment Purpose Pillars

- **Empowering Women:** Agriculture around the world depends on women farmers. The Corteva Grows program champions women to ensure they will attain individual achievement and to help bring prosperity to the communities where they live.
- **Enabling Youth:** Corteva Grows pledges to support projects and programs that will lead to educational achievement and development for youth around the world and build a diverse agricultural workforce for the future.
- **Engaging Communities:** Our communities are the heart of Corteva Agriscience. The Corteva Grows program will help improve the quality of life in communities where we live and work, striving to meet the unique needs of each community. Our volunteer efforts in local programs will ensure that our success is community success.

Our Purpose

Cultivating the future through science education with people of all ages.

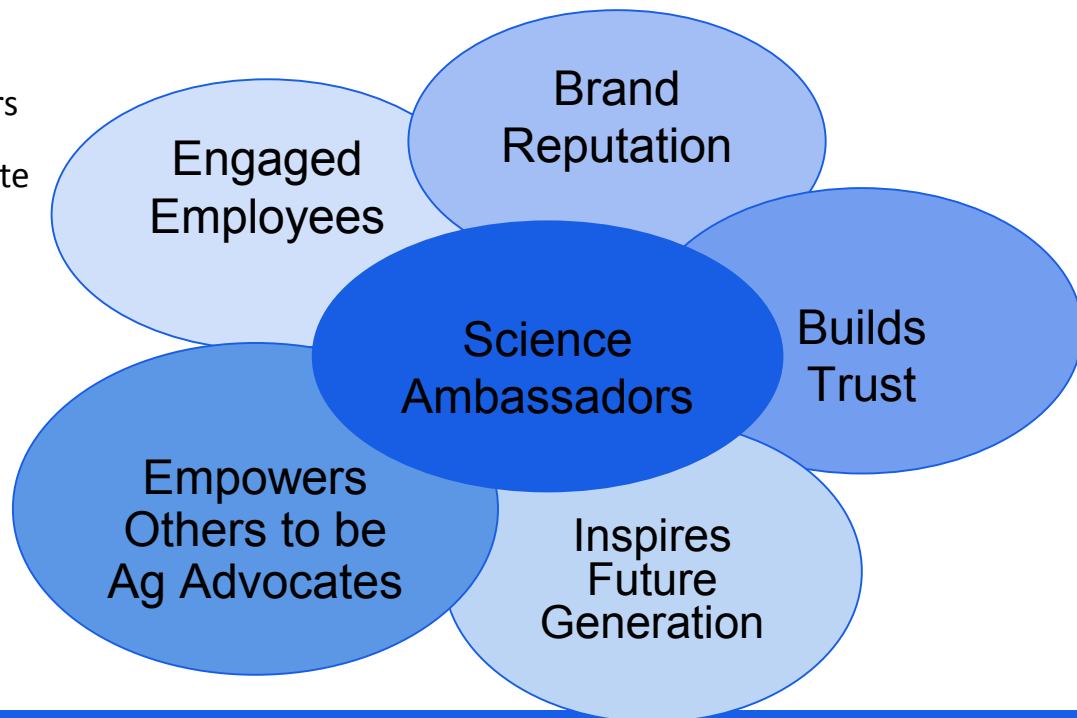

Corteva Grows Science Outreach is a global science outreach program that empowers employees to inspire their communities by promoting scientific literacy.

Indiana FFA members
volunteer with
employees at the State
Fair booth.

Marion County 4H
members volunteer
with employees at
Conner Prairie.

Thoughts That Inspire Us

“I learned where clothing comes from and how to grow plants.”

“I am learned that I can be a scientist too.”

“Really awesome event! I wasn't sure what to think prior to coming but my daughters absolutely loved it.”

“We thoroughly enjoyed it and look forward to attending again. Enjoyed that it was geared to adults and children but understand emphasis on children.”

“Very strong presence with botanists, entomologists and chemists serving as presenters for three out of the five stations. I am pleased to report they knocked it out of the park! All Science Ambassadors were engaging in their presentations and the hands-on activities were right on target. They definitely made a positive difference.”

Agriculture of Tomorrow Starts Today... With You
