

REDUCING NATURAL AND INDUCED BIOLOGICAL RISKS

JONES W. BRYAN, D.V.M.

The killing fields

FMD: MAFF fights fire with fire p8-10

Horses, though not susceptible to FMD, are capable of carrying the virus in dirt, debris, on their coats, tack, or trailer equipment. Restricted in movement for several months, by June they are allowed out on public roads in most areas, with appropriate biosecurity measures.

MAJOR REGULATORY AND POLICY NEEDS

DEFINITION OF STATE AND FEDERAL REGULATORY AUTHORITY

- MOVEMENT OF EXPOSED – POSITIVES
- ACCESS TO FARM – SURVEILLANCE AND DIAGNOSIS
- QUARANTINE
- DISPOSAL – AGENCIES INVOLVED, AVAILABLE METHODS
- REIMBURSEMENT
- ANIMAL AND PREMISE IDENTIFICATION

EDUCATION

- BIOSECURITY – A PRACTICAL TOOL FOR DISEASE PREVENTION AND CONTROL

- POTENTIAL INTRODUCTION

- ANIMALS

- VECTORS – HUMAN AND OTHERWISE

INFRASTRUCTURE

- INDIVIDUAL ANIMAL AND PREMISE IDENTIFICATION
- GIS LOCATION AND MAPS

COOPERATING AGENCIES

- USDA
- DEPARTMENT OF HEALTH
- EXTENSION
- LAW ENFORCEMENT
