

# *Economics of Digester Integration into an Energy/Nutrient Management System and Cogeneration*

William F. Lazarus  
Department of Applied Economics  
University of Minnesota

Virtual Field Day on Anaerobic Digesters as a Tool for Energy  
Production, Manure/Nutrient Management and Revenue  
Generation

October 26, 2011

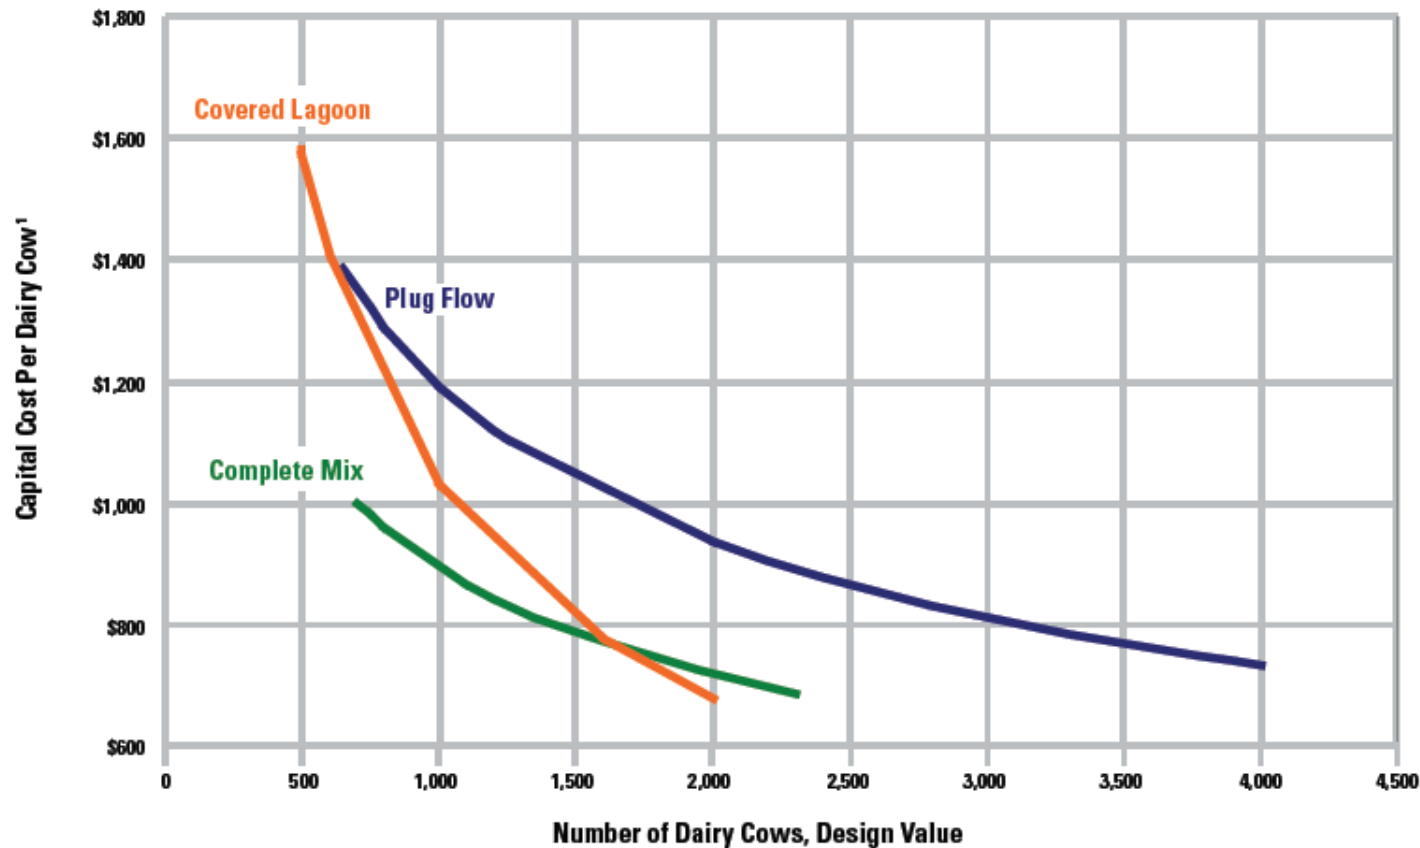

# ***WHAT IS THE VALUE OF A DIGESTER IN AN INTEGRATED DIGESTER/NUTRIENT MANAGEMENT SYSTEM?***

- Most digesters generate electricity, but electricity generally doesn't cover costs.
- Increasing interest in integrated digester/nutrient management systems.
  - There are also many dairy farms with only separators without digesters.
- Do tighter nutrient regulations call for high-efficiency separators that require a lot of energy – making digesters more valuable?

# HOW MUCH DOES A DIGESTER COST TO INSTALL?

<sup>1</sup> Costs are stated in September 2009 dollars.

Figure 2. Capital cost per dairy cow for complete mix, plug flow, and covered lagoon AD systems

Source: AgSTAR data, 40 digesters

# ***ASSUMPTIONS FOR ECONOMIC SCENARIOS***

## Investment Requirement:

Investment requirement at two example farm sizes:

1,400 cows -	\$1.3 million	\$929/cow
2,800 cows -	\$2.3 million	\$821/cow

Based on \$320,864 + \$563/dairy cow from 13 complete-mix digesters, with utility connection charges, H<sub>2</sub>S treatment, and inflation adjustment

Capital cost (6%, 20 year life): 9% of investment/year

Operation and maintenance costs: 3% of investment/year

Electricity output: 1,041 kWh/cow/year less 50 kWh/cow/year to operate

Carbon price: \$7/metric tonne

# ***ECONOMIC SCENARIOS***

	<u>1,400 cows</u>	<u>2,800 cows</u>
<u>Investment</u>	\$1.3 million	\$2.3 million

## Electricity breakeven prices (cents/kWh)

▪ No subsidies or other value	11.0 cents	9.7 cents
▪ REAP 25%	8.9	7.9

## Electricity market

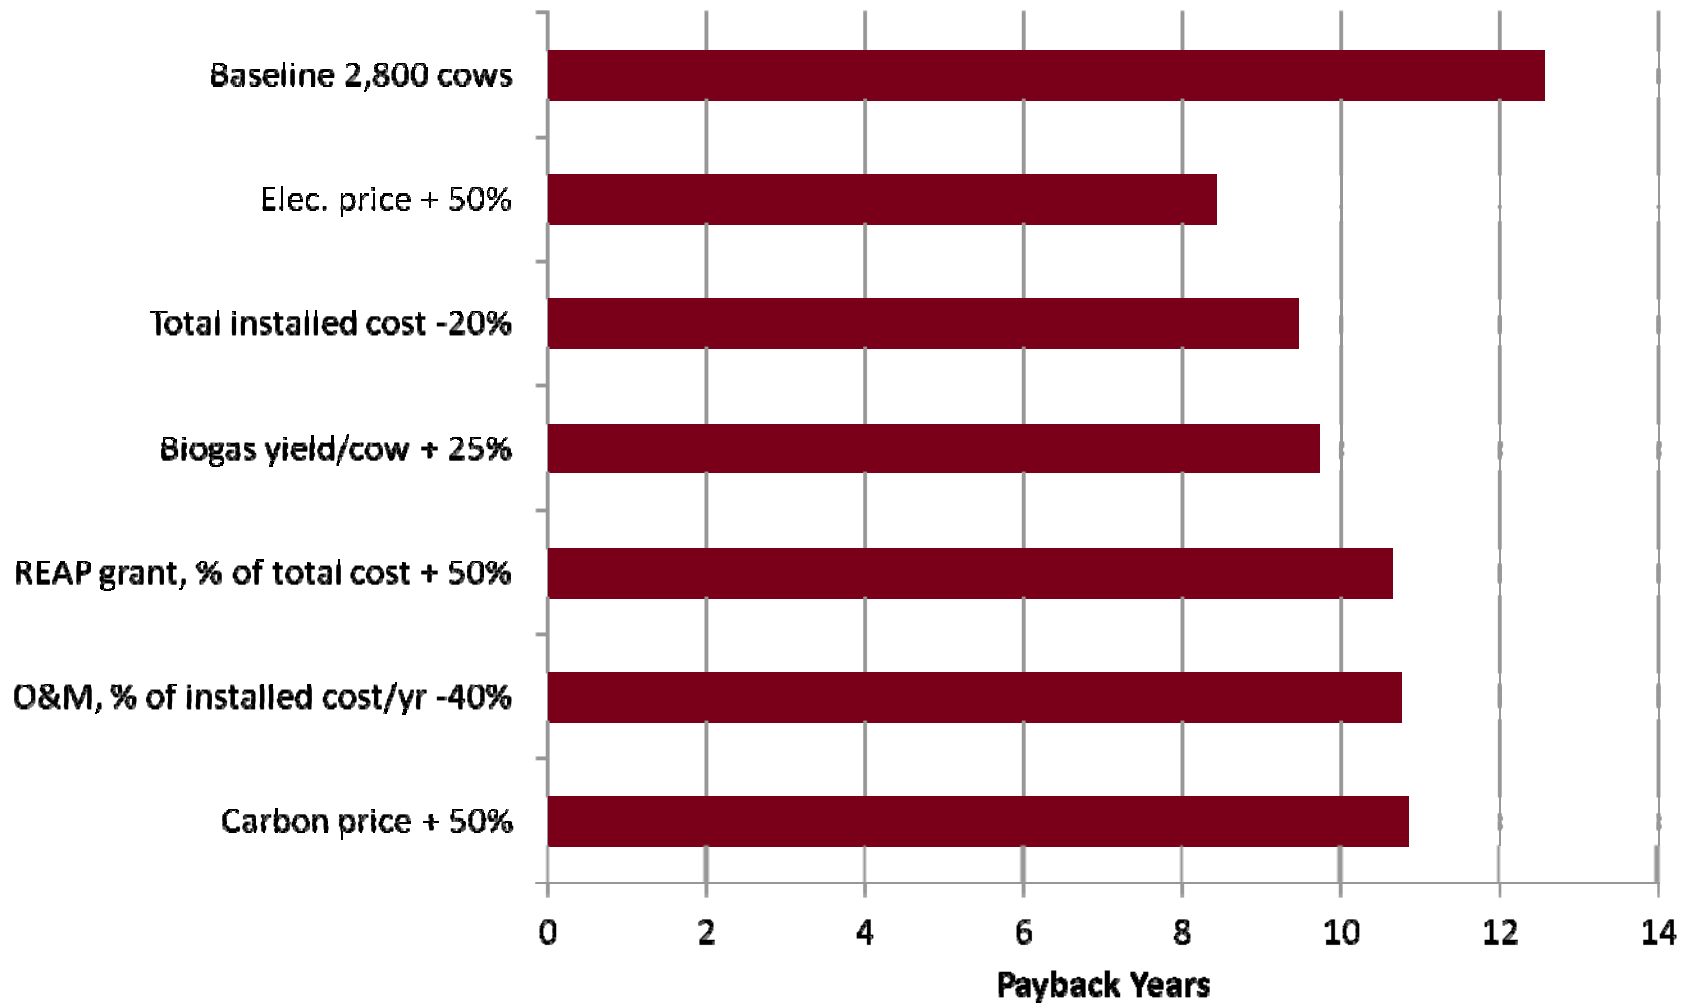

- Retail price (EIA, 1/11): U.S. average 9.8 cents, NM 8.1 cents  
range 6 cents (WY) to 17 cents (CT)

*Price for excess electricity sold back to grid?*

*Value of manure solids, odor control, RECs, other??*

# 2,800-Cow Farm, 6-cent Electricity, 25% REAP, 3% O&M, \$7 Carbon Price

# *IDEAS FOR FUTURE RESEARCH*

- AgSTAR database of operating digesters is great, but I wish I knew more about their nutrient management components, nutrient limits or trading as a motivating factor, and solids utilization.
- Economics of compressing biogas for transportation fuel, or injecting it into the natural gas grid?
- Other ...

# MY SPREADSHEET FOR ANALYZING DIGESTER ECONOMICS

	A	B	C	D	
1	<b>"Anaerobic Digester Economics" Spreadsheet</b>				
3	UNIVERSITY OF MINNESOTA	by William F. Lazarus, Extension Economist			
4	<b>EXTENSION</b>		Last modified on 9/13/11
