Vehicles Powered by Cellulosic Materials: The Biotruck

Wayne Keith

Springville, Alabama

waynekeith01@alltel.net

CAN YOU GO
WITHOUT
GAS?

Wood you believe it — truck runs on LUMBER!

Wayne Keith pushes a wheelbarrow full of "fuel" for his truck. His son and grandson lend a hand when he "gasses" up.

Sky-high gas prices are no problem for THIS farmer

The farmer rips down a country road with his kids pedaling alongside. Left, extra pedals control the burning fuel.

The truck's all fueled up and ready to go.

Wayne checks under the hood to make sure things are right.

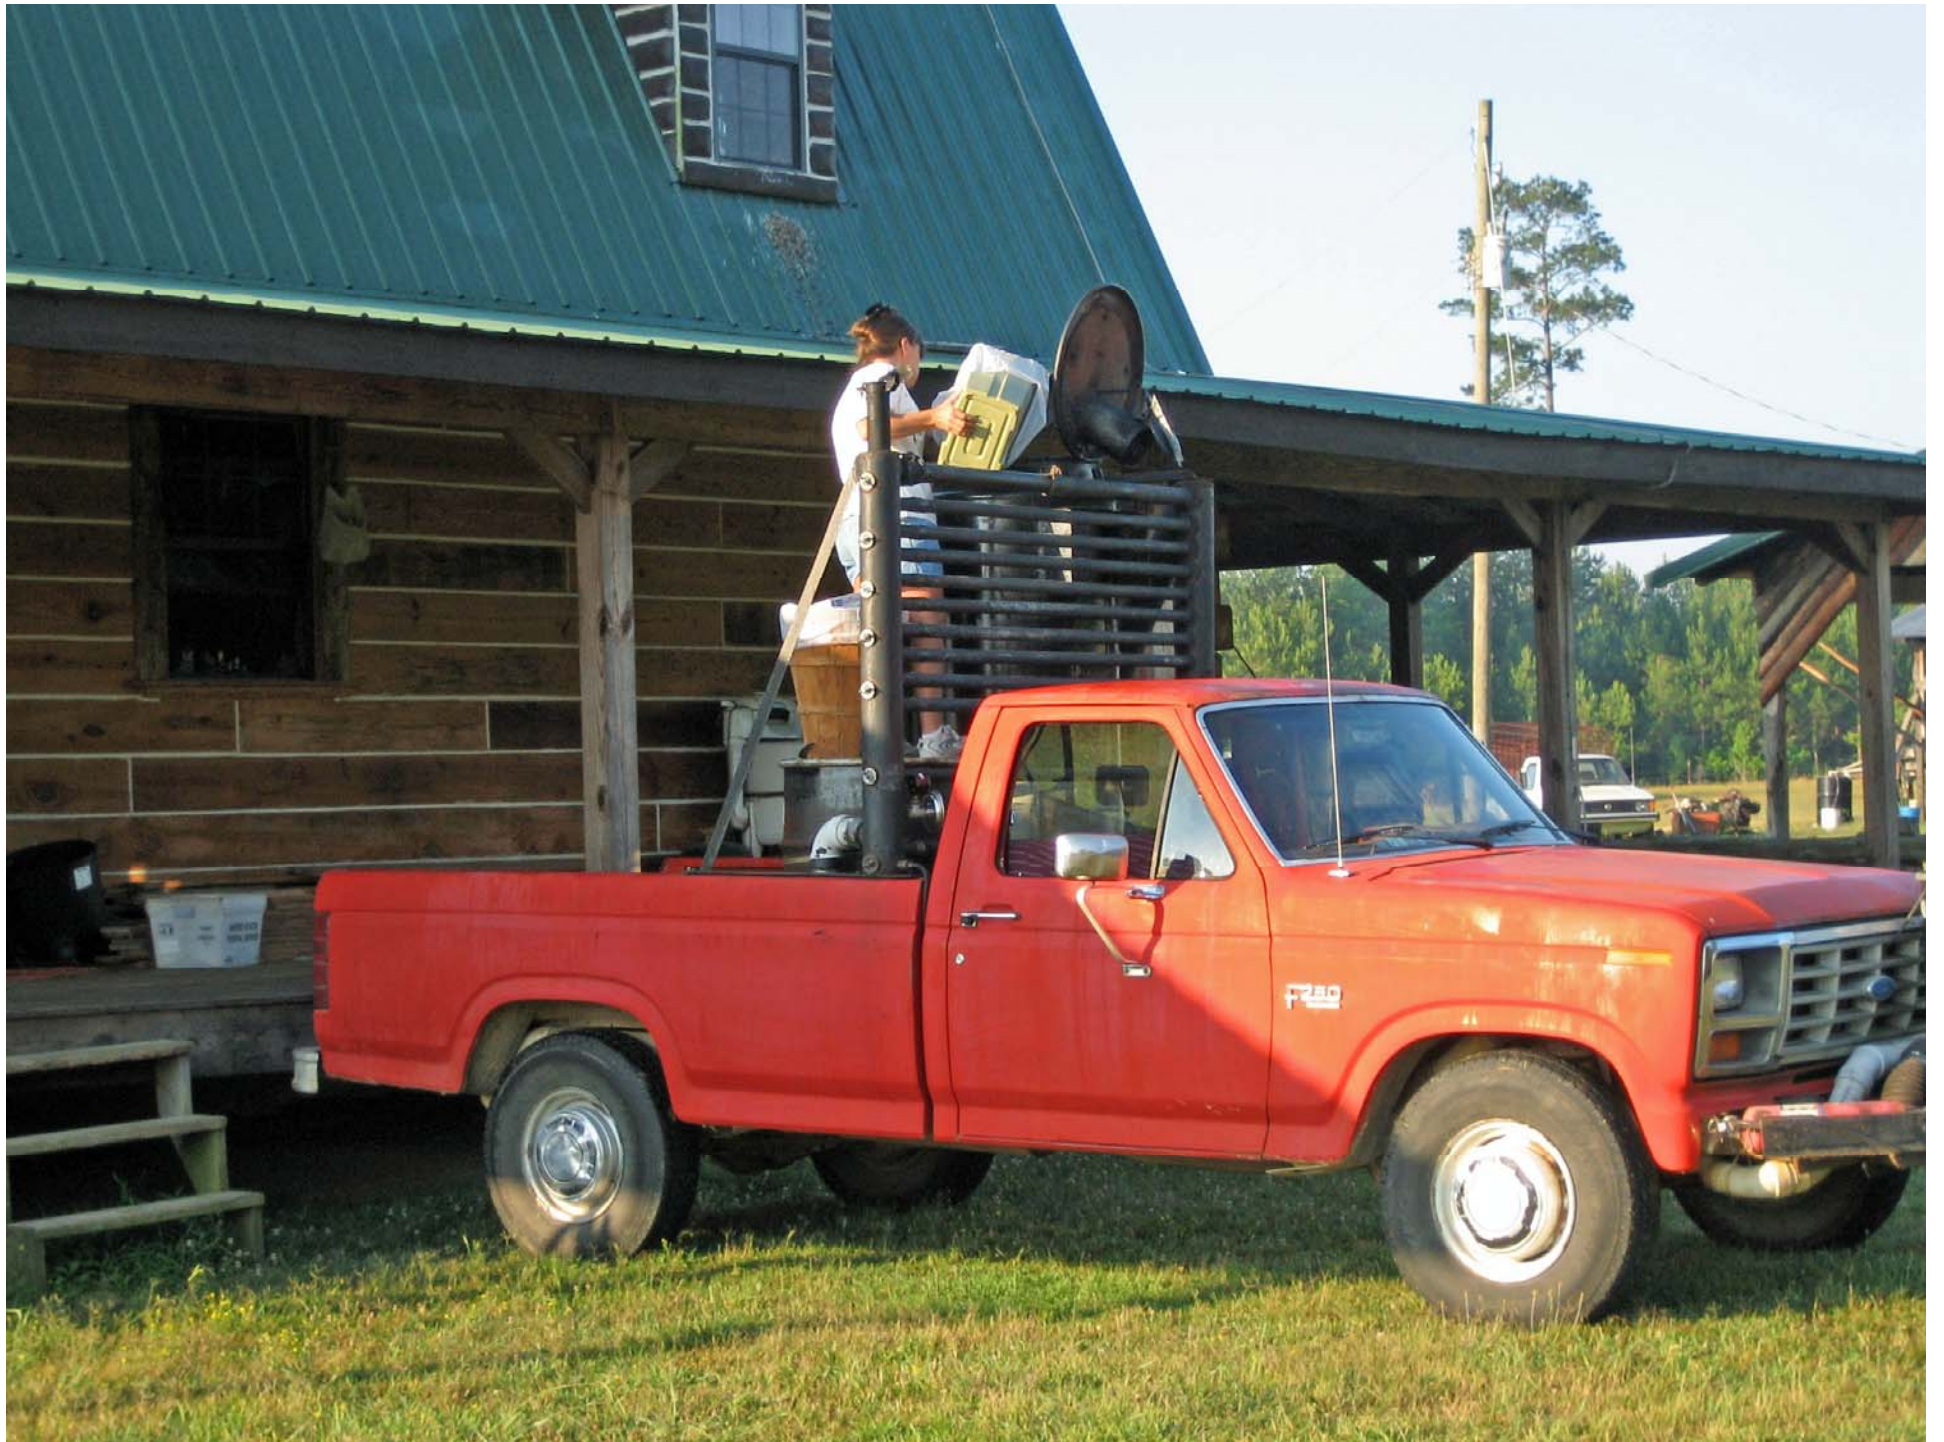

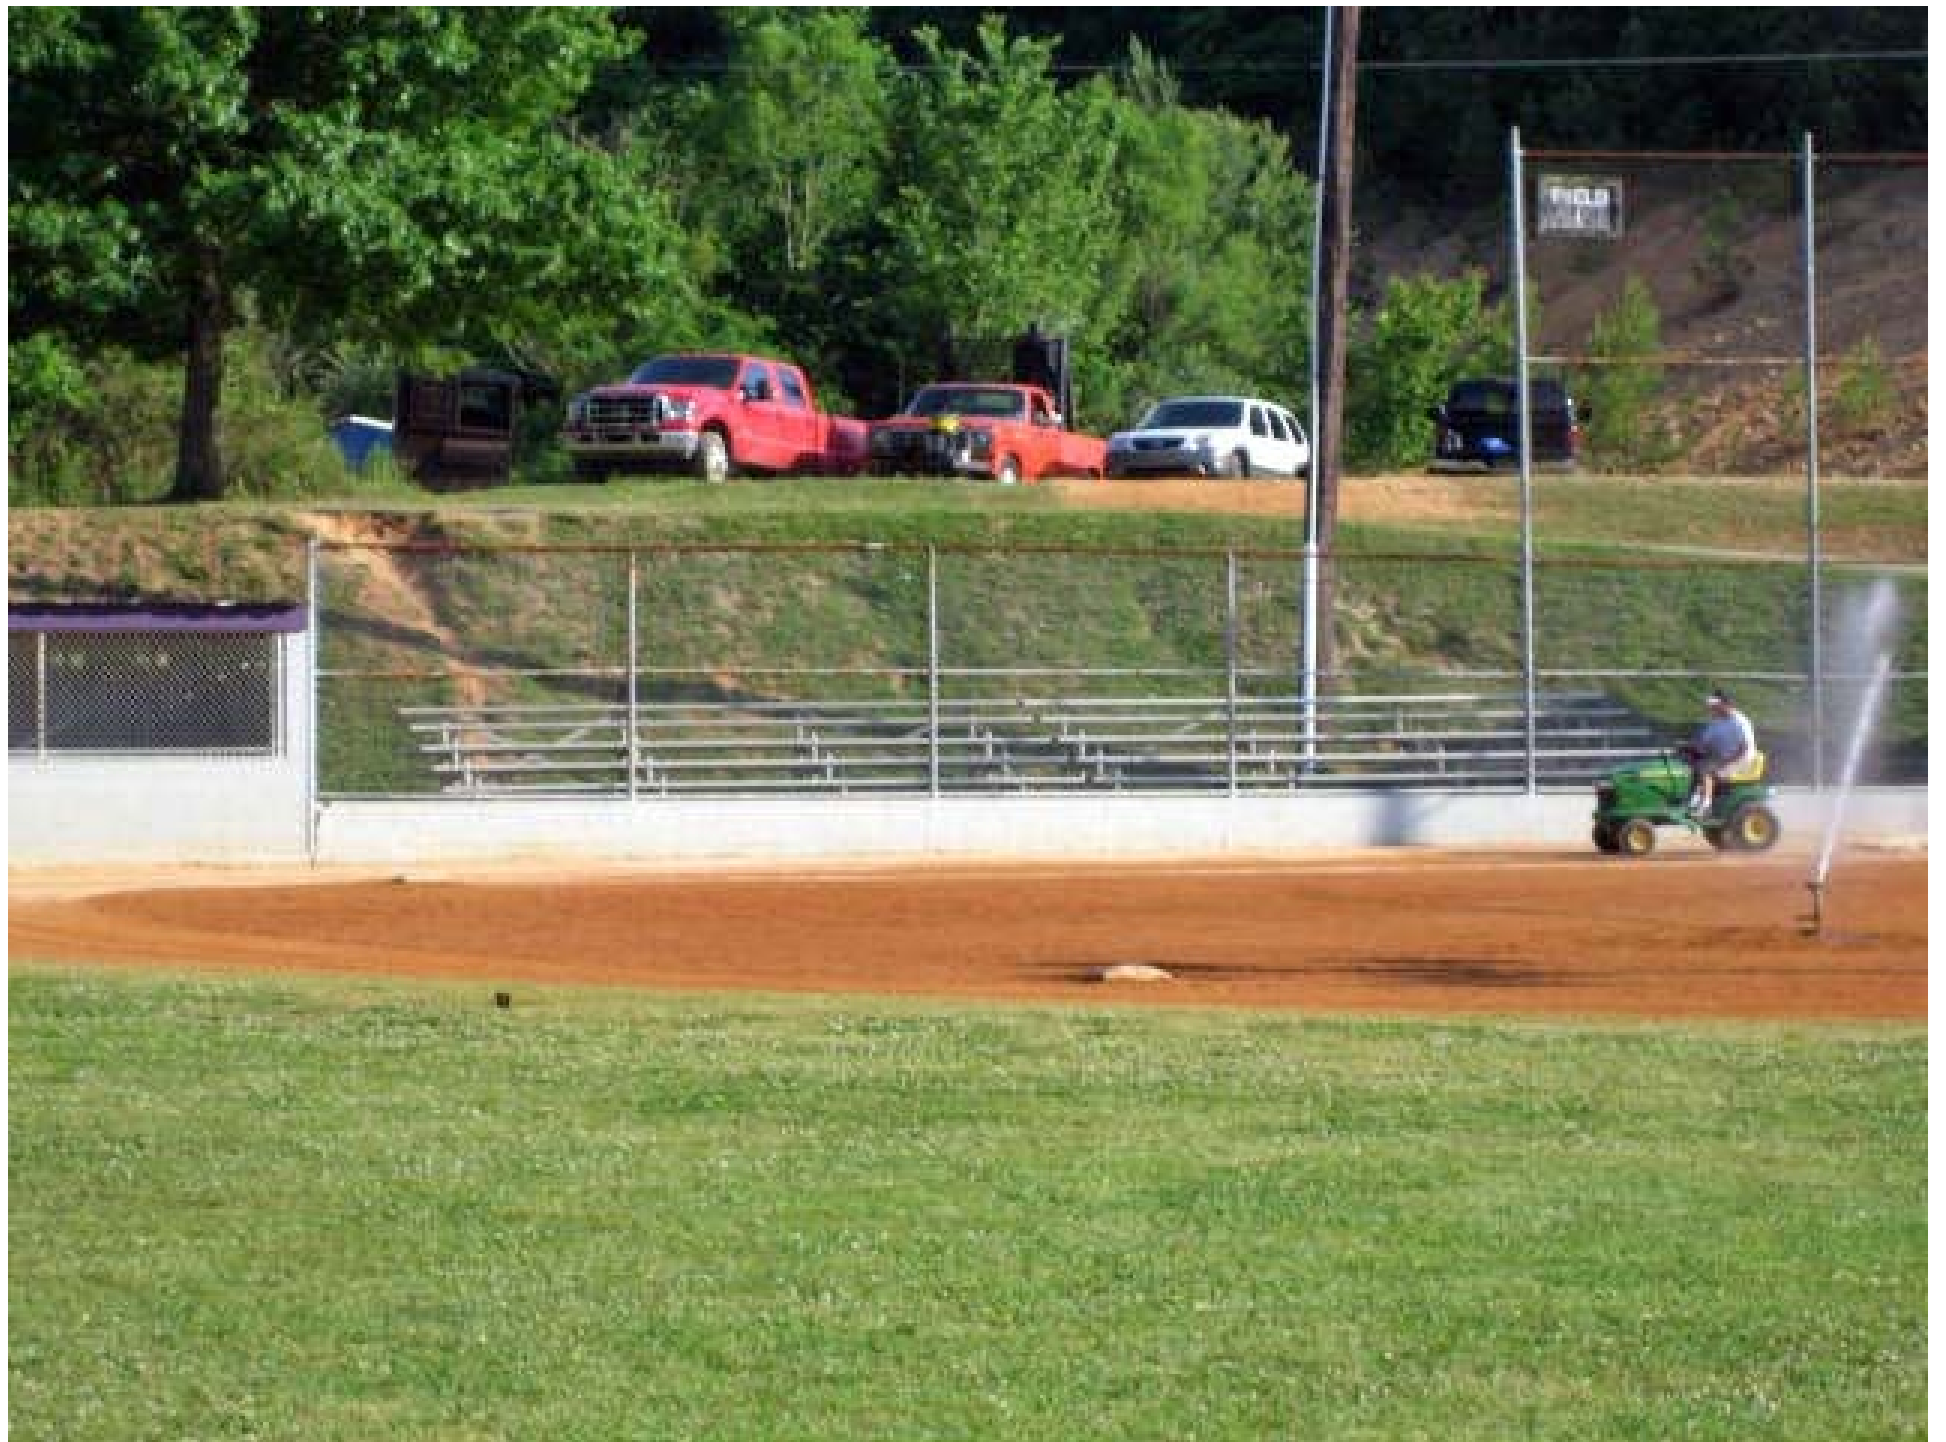

Thank you for your attention!
